<b>15</b>	<b>Defined Attribute Values</b>	
{any} Any element not part of Schema namespace.		
#all All of the values listed		
[final attribute] controls further derivation		\$3.4.1 pt1
list A finite-length (possibly empty) sequence of values		
union A combination of one or more other datatypes.		
restriction Values for constraining facets are specified to a subset of those of its base type.		

[namespace attribute] controls use of namespaces	§3.4.2 pt1
##any Any namespace (default)	
##other Any namespace other than target namespace	
##targetNamespace Must belong to the target namespace of schema	
##local Any unqualified XML from local namespace	
[processContents attribute] specify how contents should be processed for validation	§3.10.1 pt1
strict There must be a top-level declaration for the item available, or the item must have an xsi:type, and must be valid.	
skip No constraints at all: the item must simply be well-formed.	
lax Validate where you can, don't worry when you can't.	
[form attribute] controls namespace qualifying	§3.2.2 pt1
qualified Namespace qualified	
unqualified No namespace qualification	
[use attribute] specifies the use of an attribute	§3.2.2 pt1
optional Attribute is optional	
prohibited Attribute is prohibited	
required Attribute is required to have a value	
[whitespace attribute] specifies whitespace handling	§3.1.4 pt 1, §4.3.6 pt 2
preserve The value is the normalized value	
replace All occurrences of tab, line feed and carriage return are replaced with space.	
collapse Contiguous sequences of spaces are collapsed to a single space, and initial and/or final spaces are deleted.	
<b>16</b>	<b>Built-in Types</b>
anyType Built-in Complex type definition of Ur-Type.	§3.4.7 pt1
anySimpleType Built-in Simple type definition of Ur-Type.	§3.14.7 pt1
<b>17</b>	<b>Schema Instance Related Markup</b>
xsi:type An element in an instance may explicitly assert its type using the attribute xsi:type. The value is a QName associated with a type definition.	§2.6.1 pt1
xsi:nil An element may be valid without content if it has the attribute xsi:nil with the value true.	§2.6.2 pt1
xsi:noNamespaceSchemaLocation,	
xsi:schemaLocation Provide hints as to the physical location of schema documents	§2.6.3 pt1
